Launch your own exchange-grade trading platform

BTSPROX is the complete trading platform for brokers — a terminal your traders already know, multi-asset wallets, funding rails, IB program and a full back office. White-label it, brand it, and go live in weeks on web, iOS and Android.

270+

instruments — crypto,
forex, metals, indices

0.01

micro lots on
every instrument

470+

local P2P payment
rails worldwide

5

languages — EN, AR,
ES, UR, ZH

Launching a brokerage shouldn't mean building an exchange.

We built the whole exchange. You bring the brand.

Matching, margin, wallets, funding, KYC, IBs, apps — years of engineering that every new broker used to rebuild from zero. BTSPROX ships it all as one platform, refined on live traders every day, and puts your name on the front.

P-01	A terminal traders know	Exchange-grade UX — live charts, order book and depth, so your clients feel at home from the first click.
P-02	Complete out of the box	Terminal, wallets, funding rails, IB program and back office — one system, no third-party patchwork.
P-03	Yours completely	White-label branding on web and mobile, your domain, your data — full control of risk and margin rules.

CONTENTS

01	The platform — trading terminal & funding	03
02	Growth & control — IB program & admin console	04
03	Features — twelve modules, all standard	05
04	Ecosystem — markets, rails & build vs buy	06
05	Delivery — timeline, faq & contact	07

Trading in front, everything else behind it

Your traders get a fast, familiar terminal on web and mobile. Behind it: multi-asset wallets, automated funding, KYC onboarding and risk controls — all one system, one database.

FOR YOUR TRADERS

A terminal they already know

- ✓ Spot, margin & derivatives with live charts and depth
- ✓ Market, limit and stop orders with TP/SL
- ✓ 270+ instruments — crypto, forex, metals, indices
- ✓ Micro lots from 0.01 on every instrument
- ✓ Strategy builder, auto-invest and instant convert

Everything a platform needs

Every module ships as standard — no per-feature pricing, no surprise add-ons.

03

01

Exchange-grade Terminal

Live charts, order book and depth, market/limit/stop orders with TP/SL — fast and familiar.

02

Multi-asset Markets

270+ instruments across crypto, forex, metals and indices — configured to your offering.

03

Micro Lots

0.01 lot minimum on every instrument — open the platform to small accounts.

04

Wallets & Transfers

Multi-asset wallets, internal transfers and shared sub-accounts with strict permissions.

05

Deposits & P2P Rails

Crypto deposits auto-credited plus 470+ local payment rails for emerging markets.

06

KYC & Onboarding

Guided KYC wizard, document review queue and automatic account approval.

07

IB & Affiliate Program

Referral links, volume commissions, partner dashboards and payout history.

08

Bonus Campaigns

Deposit bonuses, beta programmes and invite flows — configured from the admin console.

09

Admin Console

Approvals, role hierarchy, client overrides, moderation and audit on every action.

10

Risk Engine

Margin rules, exposure controls and A-book/B-book ready order routing.

11

Security

Passkeys, two-factor authentication, session controls and full activity logs.

12

Web + Mobile Apps

Modern web terminal plus branded iOS and Android apps — in 5 languages.

One platform, every market

Markets, funding rails and access channels — pre-wired. Your instrument list and rules are configured during onboarding.

04.B / BUILD VS BUY

Building it in-house

what a platform really costs

- ✗ \$500k+ engineering before the first trade
- ✗ 2+ years to terminal, wallets and apps
- ✗ Matching, margin and risk built from zero
- ✗ Security, uptime and compliance on you

THE SHORTCUT

With BTSPProX

one license, everything included

- ✓ Live in weeks — branded web, iOS & Android
- ✓ Terminal, wallets, funding & back office included
- ✓ Updates & support — we maintain the platform
- ✓ Battle-tested daily with live traders

Live in weeks, not years

05

01

Discovery & Branding

We map your offering, then brand the platform and apps to your identity.

02

Markets & Rails

Your instrument list, margin rules and payment rails configured and tested.

03

Migration & Training

Clients and balances imported; your team trained on the admin console.

04

Go-Live & Support

Launch with monitoring, continuous updates and a support line that answers.

Q1 Is it white-label?

Fully — your brand, your domain, your colors, on web and both mobile apps.

Q2 Which markets can we offer?

Crypto, forex, metals, indices and options — your instrument list is configured to your market.

Q3 Do we control the risk?

Yes — margin rules, exposure limits and A-book/B-book routing are in your hands, with dashboards.

Q4 What does it cost?

One license scoped to your size — every module included. Request a demo, same-day quote.

See it live

Book a demo — we'll walk you through the terminal, wallets and admin console on a live platform, then quote the same day.
