

• PAYMENT INFRASTRUCTURE · MERCHANT ONBOARDING

The right merchant account, matched to your business

Every business needs different payment rails. We study your requirements — industry, markets, currencies, settlement — then set you up on the rails that actually fit: card acquiring, fiat-to-crypto, e-wallets or local payment methods. Application, approval, integration and go-live — handled end to end.

10+

PSPs & gateways we've integrated hands-on

4

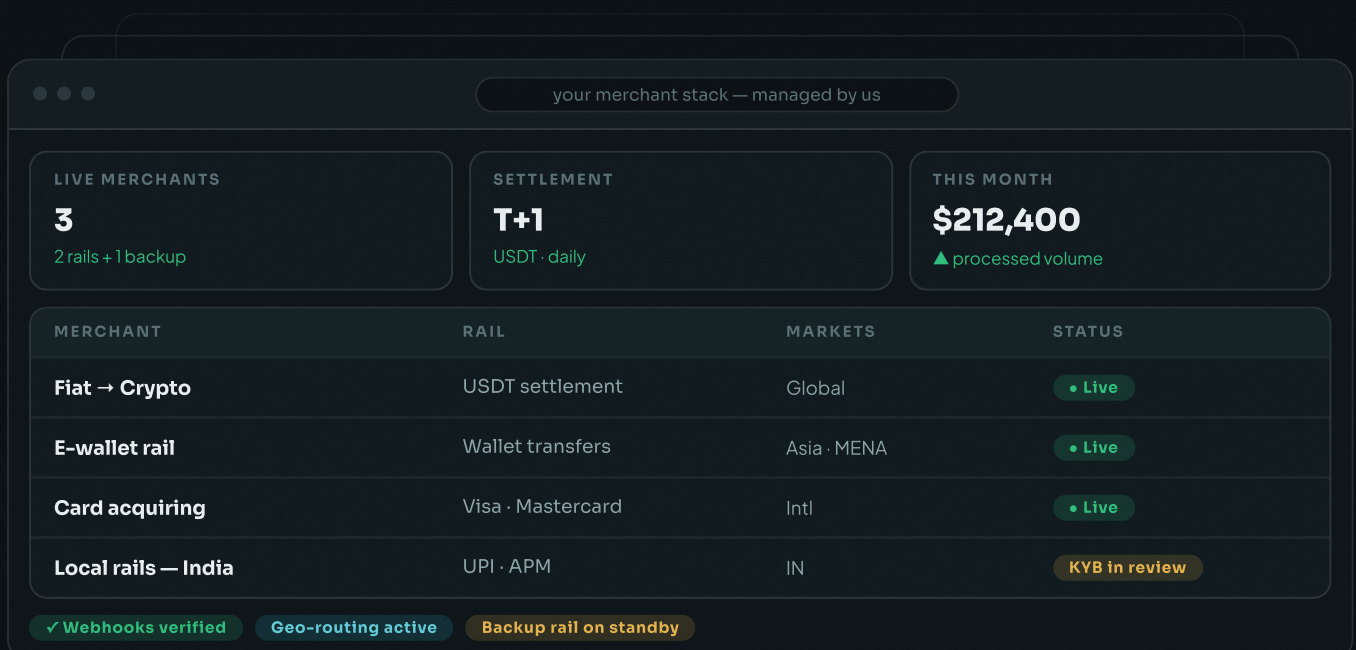

rail types — crypto, cards, wallets & local APMs

100%

requirement-matched — no one-size-fits-all

E2E

application to live transaction, one team

Every PSP says yes — until they see your industry.

We know who *actually* approves, and we take you there ready.

We run payment rails for our own live platforms every day — brokers, gaming, e-commerce. That's how we know which processor fits which business, what their compliance team will ask, and how to arrive with a file that gets approved instead of ignored.

P-01	Requirement-first	Your industry, markets, currencies and settlement needs decide the PSP — not whoever answered first.
P-02	High-risk fluent	Forex, iGaming, crypto and services — the industries most banks avoid are the ones we place daily.
P-03	End to end	Application, KYB pack, negotiation, technical integration and live test — one team, one point of contact.

CONTENTS

01	The service — matching & approval	03
02	Integration & after — wiring, testing & routing	04
03	Coverage — twelve rails & capabilities	05
04	Ecosystem — rails, industries & the DIY math	06
05	Delivery — timeline, faq & contact	07

Matched, not pitched

We don't sell you a gateway — we find the one your business actually needs, then carry the application through approval ourselves.

STEP ONE

Your requirements, mapped

- ✓ Industry and risk profile — forex, gaming, e-commerce, services
- ✓ Target markets and the currencies your customers pay in
- ✓ Settlement needs — currency, schedule, payout destination
- ✓ Volume expectations and chargeback exposure
- ✓ Result: a shortlist of PSPs that fit — with honest trade-offs

requirement profile → recommendation

YOUR PROFILE			
Industry	Forex brokerage		
Markets	MENA · South Asia		
Settlement	USDT · weekly		
Volume	\$150k-\$400k / month		

RECOMMENDED	WHY	SETUP	FIT
Fiat → crypto rail	USDT settle	~1 week	Strong
E-wallet rail	Asia wallets	~2 weeks	Strong
Card acquiring	Intl cards	KYB-heavy	Backup

STEP TWO

Application to approval

- ✓ KYB pack prepared the way their compliance team expects
- ✓ Applications filed and chased — we do the email ping-pong
- ✓ Rates, settlement and rolling-reserve terms negotiated
- ✓ Your MID, API keys and dashboards delivered ready to use
- ✓ Multiple merchants in parallel when redundancy matters

onboarding tracker

✓ Requirements & shortlist	Day 1
✓ KYB pack prepared & filed	Day 3
✓ Compliance queries answered	Day 6
• MID issued — sandbox keys live	Day 9
... Integration & live test	Next

MID · MP-88214 — API keys issued	Handover
----------------------------------	----------

Wired in, tested, and watched

TECHNICAL INTEGRATION

Our developers, your stack

- ✓ API integration into your website, CRM or platform — any stack
- ✓ Webhooks, signatures and callbacks wired and verified
- ✓ Deposit and payout flows tested with real transactions
- ✓ Checkout pages or hosted flows — whichever the PSP supports
- ✓ We've integrated these rails into our own live platforms first

integration & live test

webhook <https://yoursite.com/psp/callback> ✓ Verified

TEST TXN	RAIL	AMOUNT	RESULT
Deposit	Crypto rail	\$50.00	Credited
Payout	Crypto rail	\$25.00	Settled
Deposit	E-wallet	\$30.00	Credited

Go Live Rollback plan ready

AFTER GO-LIVE

Rails need a mechanic

- ✓ Settlement monitoring — you know where every payout stands
- ✓ Geo-routing — send each market to its best-performing rail
- ✓ Backup merchants on standby, because rails do go down
- ✓ Dispute and chargeback guidance when it matters
- ✓ New corridors added as your business grows

ongoing — routing & settlement

ROUTING

3 rails

per-market rules

MARKET	PRIMARY RAIL	BACKUP	HEALTH
MENA	E-wallet	Crypto	Healthy
South Asia	Local APM	Crypto	Healthy
Global	Fiat → crypto	—	Healthy

Whatever your **customers** pay with

Twelve capabilities we set up for clients — mixed and matched to your markets.

01

Fiat → Crypto

Customers pay in fiat, you settle in USDT and major coins — with instant settlement.

02

E-wallet Rails

Wallet-to-wallet acceptance — strong in Asia and MENA where cards are weak.

03

Card Acquiring

Visa/Mastercard merchant accounts through acquirers that accept your industry.

04

South Asia APMs

UPI, JazzCash, Easypaisa and regional rails your local customers actually use.

05

LATAM & SEA Rails

Local payment methods for Brazil, Vietnam, Indonesia, Thailand and beyond.

06

Crypto Checkout

Pay-with-crypto options your crypto-savvy customers already use and trust.

07

Payout Rails

Withdrawals and mass payouts — the half of payments most setups forget.

08

High-risk Onboarding

Forex, iGaming and crypto businesses placed with processors that accept them.

09

Multi-MID Redundancy

Parallel merchants so one compliance freeze never stops your cashflow.

10

Geo-routing Strategy

Each market routed to its best rail — success rates, fees and settlement weighed.

11

Technical Integration

Our developers wire the APIs, webhooks and checkout into your platform.

12

Ongoing Support

Settlement tracking, disputes, new corridors — a payments team on call.

Rails we work with, **daily**

Every channel below runs under our own live platforms — we recommend from experience, not brochures.

WHAT YOU GET

Approved MID

API keys & dashboard

Integration done

Live-tested flows

04.B / THE DIY MATH

Applying on your own

what usually happens

- ✗ Cold applications sit unanswered for weeks
- ✗ Wrong PSP for your industry — rejected after the wait
- ✗ KYB back-and-forth drags for months
- ✗ Approved? Now find developers to integrate it

THE SHORTCUT

With Merchant Solutions

one team, application to live

- ✓ Shortlist matched to your industry on day one
- ✓ KYB pack their compliance team says yes to
- ✓ Terms negotiated by people who process daily
- ✓ Integration and live test included — done

Processing in days, not months

01

Requirements Call

Industry, markets, currencies, settlement — your profile in one session.

02

Shortlist & Apply

Matched PSPs, KYB pack prepared, applications filed and chased.

03

Approval & Terms

MID issued; rates, settlement and reserves negotiated on your side.

04

Integrate & Go Live

APIs wired into your stack, flows live-tested, routing configured.

Q1 Which PSPs can you set up?

Any that fit — card acquiring, fiat-to-crypto processing, e-wallets and local APM providers worldwide. The match comes from your requirements, not our menu.

Q2 We're high-risk. Still possible?

Yes — forex, iGaming and crypto are our home ground. We place businesses that banks turn away.

Q3 Do you also integrate it?

Yes — our own developers wire the APIs, webhooks and checkout into your website, CRM or platform, and test with real transactions.

Q4 What does it cost?

A per-setup fee scoped to the rails and markets involved. Tell us your requirements — same-day quote.

Tell us what you need

One requirements call — we'll come back with a matched shortlist, honest trade-offs and a same-day quote.
