A casino is a thousand games, one wallet, and zero patience.

We shipped the **games**, the **wallet** and the **back office**. You bring the players.

Provider contracts, wallet engineering, bonus math, risk controls — the years of work between "let's open a casino" and the first spin. PlayCore ships it as one platform, already running a live casino with real players, and puts your brand on the door.

P-01	Proven in production	The same platform runs a live crypto casino today — real players, real payouts, every day.
P-02	Aggregated, not assembled	28 providers and 900+ games behind one integration — no separate contracts per studio.
P-03	Yours completely	White-label brand, your domain, your licence, your margins — with risk controls in your hands.
